HIDE AND SEEK™

GAME RULES

SET-UP

Shuffle the cards and lay the deck face down on the table. Players should decide whether they will share the same game board or each use their own board to search for the images.

PLAYING THE GAME

A player turns over the top card of the deck for everyone to see. Then all the players try to locate the card's illustration on the game board. The first player to spot it tells the other players. If the player is right, he or she gets to keep the card. If not, all the players try again to find the image. The player who spots the image keeps the card and turns over another card, and so on. The player with the most cards wins.

Note: Players must pay close attention, because some images may be partially hidden behind other images. Players must ensure that the image found is completely identical to the one on the card.

Note: All the images on the cards are found on each game board.

GROUP PLAY

Form two or three teams and give each team a game board and five cards picked at random. On their board, each team tries to find the images associated with their five cards. The first team to succeed wins the game. Playing the game this way fosters mutual support and team spirit.
